I'm analyzing some Python code and I don't know what `pop = population[:]` means. Is it something like array lists in Java or like a bi-dimensional array?

We'll use that fact later. `Array.apply(null, [undefined, undefined, undefined])` is equivalent to `Array(undefined, undefined, undefined)`, which produces a three-element array and assigns ...

When creating a 2D array, how does one remember whether rows or columns are specified first?

`std::array` is designed as zero-overhead wrapper for C arrays that gives it the "normal" value like semantics of the other C++ containers. You should not notice any ...

`std::array` is designed as zero-overhead wrapper for C arrays that gives it the "normal" value like semantics of the other C++ containers. You should not notice any difference in runtime ...

Extract Value from Array in Power Automate Asked 1 year, 3 months ago Modified 10 months ago Viewed 7k times

How do I remove a specific value from an array? Something like: `array.remove(value)`; Constraints: I have to use core JavaScript. Frameworks are not allowed.

The array structure has stricter rules than a list or `np.array`, and this can reduce errors and make debugging easier, especially when working with numerical data.

What does "`array [^1]`" mean in C# compiler? Asked 5 years, 3 months ago Modified 2 months ago Viewed 53k times

Sorry for the stupid question. I'm programming in PHP but found some nice code in Python and want to "recreate" it in PHP. But I'm quite frustrated about the line: `self.h = -0.1 self`.
