How much do Japanese companies spend on battery storage projects?

Since December 2023, companies have announced investments of at least \$2.6 billion in Japanese battery storage projects, according to calculations by Reuters. That includes \$677 million in spending by Japanese real estate firm Hulic (3003.T) announced in January and \$1.3 billion by trading house Sumitomo (8053.T) last year.

How big is Japan's battery storage capacity?

Rystad forecasts Japan's battery storage capacity could reach about 4 GW based on projects under construction, planned and awarded, which would require \$6 billion in investment.

Will Japan's LDA changes harm battery investment in Japan?

Mahdi Behrangrad, head of energy storage system and virtual power plant department at Pacifico Energy, an early participant in Japan's battery storage sector, with projects in Kyushu and Hokkaido, agrees the LTDA changes support existing power generation assets rather than storage and could harm additional battery investments in Japan.

How much battery power does Japan have?

As of March, Japan had 0.23 GW of grid-connected BESS, according to METI. By comparison, China has 75 GW and the U.S. has installed nearly 26 GW of battery storage capacity, according to the Energy Institute.

.

Japan's largest renewable battery energy storage system (BESS) project has broken ground in Kyushu spearheaded by developers, Osaka Gas and Sonnedix. The construction will ...

Companies have announced at least \$2.6 billion in Japanese battery storage projects since December 2023. Japan's non-fossil power sources ...

Since December 2023, companies have announced investments of at least \$2.6 billion in Japanese battery storage projects, according to calculations by Reuters.

Companies have announced at least \$2.6 billion in Japanese battery storage projects since December 2023. Japan's non-fossil power sources reached 31.4%, exceeding 30% for the first ...

HIROSHIMA, Japan - Mazda Motor Corporation (Mazda) has announced that it will build a new module pack plant for automotive cylindrical lithium-ion battery cells in Iwakuni City, Yamaguchi Prefecture, ...

This plant will assemble modules of automotive cylindrical lithium-ion battery cells sourced from Panasonic Energy Co., Ltd., and package them into battery packs. The plant aims to create a safe, ...

Nine Japanese companies will establish a joint venture to build a low-cost, high-efficiency EV battery production system as early as April 2026, ...

A major Tesla-powered energy storage project has officially gone live in northern Japan, marking one of the country's most significant grid battery deployments to date.

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK ...

An automotive battery pack used in light EV models sold by Nissan and Mitsubishi Motors. The government and private sector are moving to strengthen the ...
