From residential rooftops to large-scale commercial installations, we deliver reliable off-grid and on-grid solar systems that reduce costs and carbon footprint.

The new all-in-one sustainable solar power system dubbed "MySol Boss" was officially launched during the opening of the fourth edition of the ...

Rwanda's ambitious vision to achieve 60% renewable energy by 2030 hinges on one critical component: Kigali energy storage battery supply. As solar and wind projects multiply, reliable battery systems ...

The Kigali Grid Energy Storage System involves several innovative solutions to enhance energy reliability and sustainability: A microgrid with advanced energy storage and solar PV is proposed to ...

To mitigate the power reliability problem, a solar-based distributed generation (DG) is modelled and evaluated in this study. Each feeder has been considered separately with an appropriately designed ...

Designed to address the intermittent nature of solar power, this system seamlessly integrates photovoltaic generation with advanced battery storage. Think of it like a "power bank" for solar ...

As Rwanda accelerates its transition to sustainable energy, the Kigali Energy Storage Power Station emerges as a game-changer. This article explores how this project enhances grid stability, supports ...

To resolve these issues, the Centre collaborated with a specialist company to implement modern technologies, which led to the installation of 24 solar panels and two advanced batteries. ...

The new all-in-one sustainable solar power system dubbed "MySol Boss" was officially launched during the opening of the fourth edition of the Energy Week Conference and Exhibition ...

With the construction of the new power system, a large number of new elements such as distributed photovoltaic, energy storage, and charging piles are continuously connected to the ...
