In a groundbreaking advance for renewable energy, researchers from Norway and Germany have developed a pioneering underwater energy storage system that turns ocean pressure ...

In a groundbreaking advance for renewable energy, researchers from Norway and Germany have developed a pioneering underwater energy storage ...

The Snøhvit Future project at Melkøya in Hammerfest will secure continued gas exports and economic development in Northern Norway, while cutting greenhouse gas emissions cost-effectively.

Ever wondered how a city known for fjords and northern lights is quietly becoming a global energy storage pioneer? The Oslo Grid Energy Storage Project is rewriting the rules ...

Norwegian utility company Arva is to use three Rolls-Royce mtu EnergyPack battery energy storage systems to investigate how a public power grid can be stabilized using ...

Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the deep sea to deliver electricity on demand. This ...

Norwegian utility company Arva is to use three Rolls-Royce mtu EnergyPack battery energy storage systems to investigate how a public power grid can be stabilized using electricity ...

DNV GL, a Norwegian energy company, has been developing a solution to this storage problem. That is, they build an artificial "Energy Island" as storage. When there is a surplus of wind energy, the excess ...

ROBINSON will optimise the utilisation of local renewable resources by deploying an integrated, smart and cost-efficient energy system coupling thermal and electrical networks, ...

DNV GL, a Norwegian energy company, has been developing a solution to this storage problem. That is, they build an artificial "Energy Island" as storage. ...
