Is it safe to mount rack equipment vertically or horizontally?

First off, it's perfectly safe to mount your equipment vertically and not horizontally. With a vertical wall mount, it's even better because you won't have an enclosure protruding 36 inches from the wall. These vertical wall mounts let you mount up to 8U of rack equipment in a sleek and less invasive box hanging from the wall.

Can a rack be mounted vertically or horizontally?

Vented to keep your equipment cool, this rack can be mounted vertically or horizontally to the wall in your office, server room, doorway or any out of the way place. The rack is EIA/ECA 310-E Compliant and can accommodate your standard 19-inch rack mount equipment.

What is a NavePoint vertical server rack?

Please sign in to provide feedback. This 4U wall-mounted Vertical Server Rack by NavePoint is perfect mounting your networking, server or telecom equipment in space constrained situations.
